Senior Reinforcement Learning Engineer Job Description

We are looking for a highly skilled Senior Reinforcement Learning Engineer who will be responsible for designing, developing, and optimizing advanced reinforcement learning systems. You will work on complex decision-making problems, contribute to system architecture, and collaborate with cross-functional teams to deliver scalable AI solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 4 to 7 years of experience in machine learning, reinforcement learning, or related roles.

Senior Reinforcement Learning Engineer Responsibilities:

- Designing and implementing advanced reinforcement learning models and algorithms.
- Developing intelligent agents for complex decision-making and control systems.
- Working with simulation environments and large-scale datasets.
- Optimizing reward functions, policies, and training processes.
- Evaluating model performance and improving convergence and stability.
- Collaborating with engineers and researchers to integrate RL systems.
- Deploying and monitoring RL models in production environments.
- Debugging and optimizing complex RL systems.
- Mentoring junior engineers and supporting team development.
- Staying updated with advancements in reinforcement learning and AI.

Senior Reinforcement Learning Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 4 to 7 years of experience in machine learning or reinforcement learning.
- Strong proficiency in Python.
- Experience with RL frameworks such as OpenAI Gym, Stable-Baselines, or RLlib.
- Advanced understanding of deep learning, neural networks, and optimization techniques.
- Experience with simulation environments and real-world applications.
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.
- Leadership and mentoring skills.
- Ability to work on complex and large-scale decision systems.
