

Junior Software Engineer Job Description

We are looking for a motivated and detail-oriented junior software engineer who, along with our development team, will be responsible for assisting in building, testing, and maintaining software applications. Duties will include but are not limited to writing code, debugging applications, and supporting software development processes. You will work closely with senior engineers and cross-functional teams to deliver high-quality and scalable software solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 0 to 2 years of experience in software development or relevant internships.

Junior Software Engineer Responsibilities:

- Assisting in the design, development, and maintenance of software applications.
- Writing clean, efficient, and maintainable code using programming languages such as Python, Java, or C++.
- Participating in debugging, testing, and troubleshooting software issues.
- Collaborating with team members to understand project requirements and technical specifications.
- Assisting in code reviews and learning best coding practices.
- Supporting the software development lifecycle, including development, testing, and deployment.
- Working with version control systems such as Git.
- Learning and applying new technologies, tools, and frameworks.
- Documenting code and technical processes.
- Ensuring software performance, quality, and responsiveness.

Junior Software Engineer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 0 to 2 years of experience in software development or internships.
- Basic knowledge of programming languages such as Python, Java, or C++.
- Understanding of fundamental computer science concepts such as data structures and algorithms.
- Familiarity with version control systems such as Git.
- Basic understanding of databases and SQL.
- Familiarity with development tools such as Visual Studio Code, IntelliJ, or Eclipse.
- Basic knowledge of web development (HTML, CSS, JavaScript) is a plus.
- Strong problem-solving and analytical thinking skills.
- Good communication and teamwork skills.
- Willingness to learn and grow in a fast-paced environment.
