SUMMARY

AI-focused Software Engineer building production-grade LLM applications and scalable backend systems. Experienced in designing and deploying Retrieval-Augmented Generation (RAG) pipelines, NLP services, and AI-integrated product flows using TypeScript, Node.js, and cloud infrastructure. Strong in clean architecture, debugging, and shipping reliable AI features from concept to deployment.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, PHP, SQL

Frontend Development: React, HTML5, CSS3, Responsive UI Systems, Component-Based Architecture

Backend Development: Node.js, Express.js, RESTful API Design, Authentication & Authorization (JWT, RBAC), Middleware Design, OOP, CRUD Operations, Error Handling, API Security Best Practices

Databases: MongoDB, MySQL, SQLite, Database Schema Design, Query Optimization, Indexing

Cloud & DevOps: Microsoft Azure (App Services, Deployment), Docker, Environment Configuration, Production Deployment

AI & NLP: NLP Pipelines, SBERT, spaCy, GLiNER, Retrieval-Augmented Generation (RAG), Model Integration, Prompt Engineering, API-Based AI Systems

Tools & Practices: Git, Agile/Scrum, Code Reviews, Refactoring, Debugging

PROJECTS

GradVoice — AI CV & Job Description Analyzer (Full-Stack LLM Application | Azure | RAG)

- Built and deployed a production-ready LLM-powered evaluation engine integrating NLP pipelines and Retrieval-Augmented Generation (RAG).
- Designed AI service layers that integrate directly into product workflows (CV upload → parsing → semantic analysis → gap scoring).
- Engineered skill extraction and semantic similarity pipelines using SBERT, spaCy, and GLiNER.
- Implemented structured logging, error handling, and backend validation to ensure reliability in production.
- Reduced manual CV screening effort by ~60% through automated AI-based evaluation.

Company Website — Siscom Integrated Solutions

Production Website | PHP | MySQL | Frontend Optimization

- Built and deployed a live, database-driven corporate website with secure PHP form validation and MySQL integration.
- Implemented a secure inquiry and contact system with server-side validation and data persistence.
- Improved page load speed and overall user experience by approximately 30% through frontend optimization and asset compression.
- Managed end-to-end development, testing, and production deployment.

Phone Station — Corporate Website (Ajman, UAE)

Production Website | PHP | MySQL | Secure Backend | Performance Optimization

- Architected and deployed a production-grade, responsive corporate website with structured service segmentation, optimized performance, and full backend-database integration in a live environment.
- Engineered a secure contact infrastructure with server-side validation, input sanitization, honeypot anti-spam protection, and IP-based rate limiting to ensure reliability, abuse prevention, and production readiness.

EXPERIENCE

Software Engineering Intern — Siscom Integrated Solutions (Remote, UAE)

Jul 2025 – Sep 2025

- Refactored legacy backends services using modern JavaScript and object-oriented design, improving maintainability and long-term reliability.
- Debugged and resolved critical issues across development, staging, and production environments, reducing recurring production bugs.
- Supported release cycles by identifying regressions early and improving deployment stability.
- Collaborated in Agile sprints, participated in code reviews, and worked closely with distributed engineering teams.

Full Stack Developer — Siscom Integrated Solutions (Remote)

2024

- Designed and delivered a production-ready full-stack corporate website using HTML, CSS, JavaScript, PHP, and MySQL.
- Improved website performance by approximately 30% through clean code practices, asset optimization, and database query tuning.
- Built responsive, accessible UI components ensuring cross-browser and cross-device compatibility.

EDUCATION

BSc in Computing & Digital Technology — ESLSCA University, Egypt

Specialization: Media Informatics & Mixed Reality

GPA: 8.5 / 10 | Expected Graduation: 2026

American High School Diploma — Pioneers American High School, Giza

GPA: 3.88 / 4.0 | Graduated 2023

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cloud Computing Fundamentals — IBM SkillsBuild (2026)
- AI Fluency: Framework & Foundations — Anthropic / University College Cork
- Watson Assistant: Build AI Chatbots — IBM SkillsBuild
- Fingerprint Soft Skills Program — AIESEC Romania
