SUMMARY

Software engineer and final-year Computing & Digital Technologies student (Media Informatics & Mixed Reality) with hands-on experience building production web applications, scalable APIs, and cloud-deployed systems. Built and deployed GradVoice, an AI-powered CV-Job Description analysis platform using NLP and Microsoft Azure. Strong ownership mindset with experience delivering in remote, cross-functional, international teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS
Frameworks & Tools: React, Node.js, Express.js, Next.js (basic), MongoDB, MySQL, Git
Cloud & Backend: Microsoft Azure, REST APIs, Authentication, Deployment, OOP
AI / Data: NLP Pipelines, SBERT, spaCy, GLiNER, API Integration
Other: Debugging, Refactoring, Agile/Scrum

EXPERIENCE

Software Engineering Intern — Siscom Integrated Solutions (UAE, Remote)

Jul 2025 – Sep 2025

- Improved backend reliability and maintainability by refactoring legacy services using modern JavaScript and OOP principles.
- Reduced production bugs and release friction by identifying and resolving critical issues across multiple environments using structured debugging and testing workflows.
- Improved team delivery efficiency by contributing to Agile sprints, code reviews, and coordinated releases across environments.

Web Developer — Siscom Integrated Solutions (Remote)

2024

- Delivered a production-ready corporate website by designing and deploying a full-stack solution using HTML, CSS, JavaScript, PHP, and MySQL.
- Improved page load performance by ~30% through asset optimization, clean code practices, and database query tuning.
- Built responsive, accessible UI components ensuring cross-device compatibility.

Online Fitness Coach — Freelance

2022 – Present

- Managed 30+ clients by building data-driven tracking dashboards to monitor progress, retention, and outcomes.
- Increased workflow efficiency by designing internal monitoring and communication tools.

PROJECTS

GradVoice — AI CV & Job Description Analyzer

Full-Stack Application | Microsoft Azure, NLP, Voice Agent

- Built a full-stack system that semantically evaluates CVs against job descriptions, generating explainable ATS-style scores and insights.
- Reduced manual CV screening effort by ~60% by automating semantic CV-JD matching and gap analysis.
- Implemented NLP pipelines using GLiNER, SBERT, and spaCy to detect skill, experience, and education alignment.
- Designed an interactive dashboard with evidence-based scoring and gap analysis tailored for new-graduate users.
- Integrated a voice agent to explain CV gaps and recommendations conversationally.
- Deployed backend services on Microsoft Azure, ensuring scalability and reliability.

Company Website — Siscom Integration (siscomintegration.com)

- Built a secure, database-driven inquiry system using PHP form validation and MySQL.
- Improved page load speed and user experience by ~30% through frontend and asset optimization.
- Delivered a live production website by managing end-to-end development, deployment, and testing.

Space Invaders Game — Python

- Built a complete game system with collision detection, scoring logic, and real-time event handling using OOP principles.

EDUCATION

BSc in Computing & Digital Technology — ESLSCA University, Egypt
Specialization: Media Informatics & Mixed Reality
GPA: 8.5 / 10 | Expected Graduation: 2025

CERTIFICATIONS & DEVELOPMENT

- **Cloud Computing Fundamentals — IBM SkillsBuild, 2026**
- **AI Fluency: Framework & Foundations — Anthropic / University College Cork**
- **Watson Assistant: Build AI Chatbots — IBM SkillsBuild**
- **Fingerprint Soft Skills Program — AIESEC Romania**
