

Software Engineer - Job Description

Company: GradVoice AI Solutions

Location: Cairo, Egypt (Hybrid)

Experience Level: Entry-Level / Junior

About the Role

We are looking for a motivated Software Engineer to join our team and help build scalable, AI-driven web applications. You will work closely with cross-functional teams to design, develop, and deploy modern full-stack solutions.

Responsibilities

- 1 Develop and maintain full-stack web applications using modern frameworks
- 2 Build and integrate RESTful APIs
- 3 Collaborate with designers and product managers
- 4 Write clean, maintainable, and scalable code
- 5 Debug, test, and optimize application performance
- 6 Participate in code reviews and agile development processes

Requirements

- 1 Strong knowledge of JavaScript, TypeScript, and modern frameworks (React / Next.js)
- 2 Experience with backend development (Node.js, Express, or Python Flask)
- 3 Understanding of REST APIs and web architecture
- 4 Familiarity with databases (MongoDB, MySQL, or PostgreSQL)
- 5 Basic understanding of cloud platforms (Azure, AWS, or GCP)
- 6 Good problem-solving skills and attention to detail

Preferred Qualifications

- 1 Experience with AI/NLP applications
- 2 Knowledge of version control systems (Git)
- 3 Familiarity with CI/CD pipelines
- 4 Understanding of software engineering best practices
