

AI and Data Science Specialist Job Description

We are looking for a skilled and analytical AI and Data Science Specialist who will be responsible for designing, developing, and deploying data-driven and intelligent solutions. You will work closely with cross-functional teams to analyze data, build predictive models, and implement machine learning algorithms that support business decisions and innovation.

A bachelor's degree in computer science, data science, artificial intelligence, or a related field is required. Candidates should have 2 to 5 years of experience in data science, machine learning, or related roles.

AI and Data Science Specialist Responsibilities:

- Collecting, cleaning, and analyzing large datasets.
- Developing machine learning and deep learning models.
- Building predictive models and data-driven solutions.
- Collaborating with teams to identify business problems and opportunities.
- Implementing data pipelines and workflows.
- Evaluating model performance and improving accuracy.
- Visualizing data insights using dashboards and reports.
- Deploying models into production environments.
- Staying updated with AI and data science trends and technologies.
- Ensuring data quality, integrity, and security.

AI and Data Science Specialist Requirements:

- A bachelor's degree in computer science, data science, artificial intelligence, or a related field.
- 2 to 5 years of experience in data science or machine learning.
- Proficiency in programming languages such as Python or R.
- Experience with machine learning libraries such as scikit-learn, TensorFlow, or PyTorch.
- Strong understanding of statistics, probability, and data analysis.
- Experience with data visualization tools such as Power BI or Tableau.
- Knowledge of databases and SQL.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Ability to work with large and complex datasets.
