PROFESSIONAL SUMMARY

Full-Stack Software Engineer with **production deployments** across enterprise web platforms and AI-powered systems, specializing in **Node.js, React, TypeScript, Python, and Microsoft Azure**. Designed and shipped a cloud-native NLP platform that automated CV screening workflows, cutting manual effort by **~60%**. Experienced in RESTful API architecture, JWT/RBAC authentication, NLP pipelines (SBERT, spaCy, GLiNER, RAG), and Agile delivery across distributed international teams. Known for clean architecture, measurable impact, and owning the full stack from database schema to deployed UI.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL

Frontend: React, HTML5, CSS3, Responsive UI, Component Architecture, Cross-Browser Compatibility

Backend: Node.js, Express.js, REST API Design, JWT, OAuth, RBAC, Middleware, OOP, SOLID, CRUD, Error Handling

Databases: MongoDB, MySQL, SQLite, Schema Design, Query Optimization, Indexing

Cloud & DevOps: Microsoft Azure (App Services, Deployment), Docker, Git, CI/CD, Environment Configuration

AI & NLP: SBERT, spaCy, GLiNER, RAG, NLP Pipelines, LLM Integration, Prompt Engineering

Security: Input Sanitization, XSS Prevention, Rate Limiting, Server-Side Validation, Anti-Spam

Tools: Postman, Git, Agile/Scrum, Code Review, REST Testing, Debugging, VS Code

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

Siscom Integrated Solutions · Remote, UAE · Jan 2024 – Jun 2025

- Architected and delivered **2 live enterprise production websites** (Siscom & Phone Station/UAE) end-to-end — owning backend API design, database schema, frontend UI, and cloud deployment.
- Engineered a **4-layer security system** (server-side validation, XSS sanitization, honeypot anti-spam, IP rate limiting) across all client contact forms — **zero abuse incidents** post-launch.
- Boosted page load performance by **30%** via asset compression, lazy loading, image optimization, and MySQL query indexing — directly improving UX and Core Web Vitals scores.
- Refactored **3,000+ lines** of legacy PHP/JavaScript into modular OOP-structured services, reducing maintenance overhead and accelerating future developer onboarding.
- Drove Agile sprint delivery: conducted peer code reviews, resolved critical production issues within SLA, and coordinated deployments with distributed UAE-based engineering teams.

Software Engineering Intern

Siscom Integrated Solutions · Remote, UAE · Jul 2025 – Sep 2025

- Embedded with senior engineers to refactor backend production services using modern JavaScript and OOP design patterns, measurably reducing recurring production bug frequency.
- Resolved cross-environment defects (dev → staging → production), contributing to a more stable release pipeline and improved deployment confidence across the team.
- Participated in sprint planning, regression testing, and retrospectives in a professional Agile/Scrum environment serving international enterprise clients.

KEY PROJECTS

GradVoice — Production AI Platform: Semantic CV & Job Description Analyzer

Node.js · React · Python · SBERT · spaCy · GLiNER · MongoDB · Microsoft Azure App Services · RAG

- Designed and deployed a **full-stack AI SaaS platform** on Microsoft Azure that semantically scores CVs against job descriptions using NLP and Retrieval-Augmented Generation (RAG).
- Built SBERT sentence-embedding + spaCy NER + GLiNER pipeline achieving **~87% skill-matching precision**, processing a full CV-JD pair in **under 4 seconds**.
- Automated CV gap-analysis reporting, reducing manual HR screening effort by **~60%** in validated test environments — demonstrable, quantified ROI for recruiting teams.
- Architected production-grade RESTful API with **JWT authentication, RBAC, modular middleware**, and MongoDB document storage — containerized and cloud-deployed from day one.
- Integrated a **voice agent** as a tailored use case — enabling hands-free, conversational CV review and job-fit feedback directly within the platform.

EDUCATION

BSc in Computing & Digital Technology — ESLSCA University, Egypt

Specialization: Media Informatics & Mixed Reality · GPA: 8.5 / 10 · Expected Graduation: 2026

American High School Diploma — Pioneers American High School, Giza

GPA: 3.88 / 4.0 · Graduated 2023

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Cloud Computing Fundamentals — IBM SkillsBuild (2026)

AI Fluency: Framework & Foundations — Anthropic / University College Cork

Watson Assistant: Build AI Chatbots — IBM SkillsBuild

Fingerprint Soft Skills Program — AIESEC Romania
