

ANAS BAHAA ELDIN AHMED ALI

Full-Stack Software Engineer · AI Systems · Cloud & API Architecture

Cairo, Egypt · Open to Remote, Hybrid, On-site & Relocation · anasbahaa1010@outlook.com · +20 115 006 9052 · [LinkedIn](#) · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer delivering production-grade systems across enterprise platforms and AI-powered SaaS products. Designed and deployed a cloud-native NLP platform on Microsoft Azure automating CV screening workflows and cutting manual HR effort by ~60%. Specialized in Node.js, React, TypeScript, Python, and Azure with expertise in RESTful APIs, JWT/RBAC auth, NLP pipelines (SBERT, spaCy, GLiNER, RAG), and Agile delivery across distributed international teams. Owns the full stack end-to-end — from database schema to deployed, production-ready UI.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, PHP, SQL
Frontend	React, HTML5, CSS3, Responsive UI, Component Architecture, Cross-Browser Compatibility
Backend	Node.js, Express.js, REST API Design, JWT, OAuth, RBAC, OOP, SOLID, Middleware, Error Handling
Databases	MongoDB, MySQL, SQLite, Schema Design, Query Optimization, Indexing
Cloud/DevOps	Microsoft Azure (App Services, Deployment), Docker, Git, CI/CD, Environment Configuration
AI & NLP	SBERT, spaCy, GLiNER, RAG, NLP Pipelines, LLM Integration, Prompt Engineering
Security	Input Sanitization, XSS Prevention, Rate Limiting, Server-Side Validation, Anti-Spam/Honeypot

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer | Siscom Integrated Solutions

Jan 2024 – Jun 2025 · Remote · UAE

- Architected and delivered 2 live enterprise production websites end-to-end — backend API design, database schema, frontend UI, and cloud deployment on Azure.
- Engineered 4-layer security system (server-side validation, XSS sanitization, honeypot anti-spam, IP rate limiting) across all client-facing surfaces — zero abuse incidents post-launch.
- Boosted page load performance by 30% via asset compression, lazy loading, image optimisation, and MySQL query indexing — directly improving Core Web Vitals.
- Refactored 3,000+ lines of legacy PHP/JavaScript into modular OOP services, reducing maintenance overhead and accelerating developer onboarding.
- Led Agile sprint delivery: peer code reviews, resolved critical production incidents within SLA, coordinated deployments with distributed UAE-based engineering teams.

Software Engineering Intern | Siscom Integrated Solutions

Jul 2025 – Sep 2025 · Remote · UAE

- Refactored backend production services using modern JavaScript and OOP patterns, measurably reducing recurring bug frequency across the release pipeline.
- Resolved cross-environment defects (dev → staging → production); participated in sprint planning, regression testing, and Agile retrospectives.

KEY PROJECTS

GradVoice — AI SaaS Platform *Node.js · React · Python · SBERT · spaCy · GLiNER · MongoDB · Microsoft Azure · RAG*

- Designed and deployed full-stack semantic CV & JD analyzer on Azure; SBERT + spaCy NER + GLiNER pipeline achieved ~87% skill-matching precision with sub-4-second processing per CV-JD pair.

- Automated CV gap-analysis reporting — reducing manual HR screening effort by ~60% in validated environments with quantified, demonstrable ROI for recruiting teams.
- Production RESTful API with JWT auth, RBAC, modular middleware, MongoDB, and a conversational voice agent for hands-free CV review — containerised and cloud-deployed from day one.

PhoneStation.org — Enterprise Web System *Node.js · PHP · MySQL · HTML/CSS/JS · Azure*

- Full production system with 4-layer security (rate limiting, honeypot, sanitisation, server-side validation) and 30% load-time improvement via lazy loading and query indexing — zero abuse incidents.

E D U C A T I O N

BSc Computing & Digital Technology — Media Informatics & Mixed Reality

ESLSCA University, Egypt

GPA: 8.5 / 10

Expected 2026

American High School Diploma

Pioneers American High School, Giza

GPA: 3.88 / 4.0

Graduated 2023
