

AI Ethics Consultant Job Description

We are looking for a knowledgeable and responsible AI Ethics Consultant who will be responsible for ensuring that AI systems are developed and deployed in an ethical, transparent, and fair manner. You will work closely with data scientists, engineers, legal teams, and stakeholders to assess risks, ensure compliance, and promote responsible AI practices.

A bachelor's degree in computer science, data science, law, ethics, or a related field is required. Candidates should have 3 to 6 years of experience in AI, ethics, governance, or related roles.

AI Ethics Consultant Responsibilities:

- Evaluating AI systems for ethical risks, bias, and fairness issues.
- Developing and implementing AI governance frameworks and policies.
- Ensuring compliance with data protection and AI regulations.
- Collaborating with technical and non-technical teams to promote responsible AI practices.
- Conducting audits and impact assessments of AI systems.
- Advising on transparency, accountability, and explainability in AI models.
- Identifying potential risks and recommending mitigation strategies.
- Providing training and guidance on ethical AI practices.
- Staying updated with global AI ethics standards and regulations.
- Communicating ethical considerations to stakeholders and leadership.

AI Ethics Consultant Requirements:

- A bachelor's degree in computer science, data science, law, ethics, or a related field.
- 3 to 6 years of experience in AI, ethics, governance, or related roles.
- Strong understanding of AI systems and their societal impact.
- Knowledge of AI ethics principles, fairness, and bias mitigation techniques.
- Familiarity with data protection laws and AI regulations.
- Strong analytical and critical thinking skills.
- Excellent communication and stakeholder management abilities.
- Ability to bridge technical and ethical perspectives.
- Experience in risk assessment and policy development.
- Commitment to responsible and ethical AI practices.
