

AR Developer Job Description

We are looking for a skilled and innovative AR Developer who will be responsible for designing, developing, and maintaining augmented reality applications. You will work closely with developers, designers, and stakeholders to build interactive and engaging AR experiences across multiple platforms.

A bachelor's degree in computer science, software engineering, multimedia, or a related field is preferred. Candidates should have 2 to 5 years of experience in AR/VR development, game development, or related roles.

AR Developer Responsibilities:

- Designing and developing augmented reality applications and features.
- Building interactive AR experiences and environments.
- Writing efficient and optimized code for AR systems.
- Collaborating with designers and developers to create engaging user experiences.
- Integrating AR SDKs such as ARKit, ARCore, or Vuforia.
- Optimizing applications for performance and responsiveness.
- Debugging and troubleshooting AR applications.
- Conducting testing and improving system quality.
- Ensuring cross-platform compatibility.
- Staying updated with AR technologies and best practices.

AR Developer Requirements:

- A bachelor's degree in computer science, software engineering, multimedia, or a related field (preferred).
- 2 to 5 years of experience in AR/VR development or game development.
- Strong knowledge of AR platforms such as ARKit, ARCore, or Vuforia.
- Experience with Unity or Unreal Engine.
- Proficiency in programming languages such as C#, C++, or JavaScript.
- Understanding of 3D graphics and spatial computing.
- Knowledge of user experience (UX) in augmented environments.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Passion for immersive technologies.
