

Cloud Engineer Job Description

We are looking for a skilled cloud engineer who, along with our engineering and operations teams, will be responsible for designing, implementing, and maintaining cloud-based infrastructure and services. Duties will include but are not limited to managing cloud environments, optimizing performance, and ensuring system reliability and security. You will collaborate with development and DevOps teams to build scalable and efficient cloud solutions.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 2 to 5 years of experience in cloud computing, DevOps, or related roles.

Cloud Engineer Responsibilities:

- Designing and implementing cloud infrastructure on platforms such as AWS, Azure, or Google Cloud.
- Managing and maintaining cloud environments and services.
- Monitoring system performance and ensuring high availability and reliability.
- Automating infrastructure provisioning using tools such as Terraform or CloudFormation.
- Collaborating with development and DevOps teams to support application deployment.
- Implementing security best practices and ensuring compliance standards.
- Managing containerization technologies such as Docker and orchestration tools like Kubernetes.
- Troubleshooting and resolving cloud and infrastructure issues.
- Optimizing system performance, scalability, and cost efficiency.
- Maintaining documentation of cloud systems and processes.

Cloud Engineer Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 2 to 5 years of experience in cloud computing, DevOps, or related roles.
- Strong knowledge of cloud platforms such as AWS, Azure, or Google Cloud.
- Experience with infrastructure-as-code tools such as Terraform or CloudFormation.
- Familiarity with containerization tools such as Docker and Kubernetes.
- Knowledge of scripting languages such as Bash or Python.
- Familiarity with CI/CD tools and deployment pipelines.
- Strong understanding of networking, system monitoring, and security practices.
- Proficiency with version control systems such as Git.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
