

DevOps Team Lead Job Description

We are looking for a highly experienced and strategic DevOps team lead who, along with our engineering and operations teams, will be responsible for leading DevOps initiatives and managing infrastructure and deployment processes. Duties will include but are not limited to overseeing CI/CD pipelines, managing cloud infrastructure, and guiding DevOps teams to ensure high availability, scalability, and security of systems. You will collaborate closely with stakeholders and development teams to align infrastructure strategies with business goals.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 6 to 10+ years of experience in DevOps, system administration, or related roles, including leadership experience.

DevOps Team Lead Responsibilities:

- Leading DevOps teams and managing infrastructure and deployment processes.
- Designing and overseeing CI/CD pipelines and automation workflows.
- Managing and optimizing cloud infrastructure on platforms such as AWS, Azure, or Google Cloud.
- Ensuring system scalability, reliability, and security.
- Collaborating with development teams to streamline deployment and integration processes.
- Managing containerization technologies such as Docker and orchestration tools like Kubernetes.
- Monitoring system performance and addressing operational issues.
- Defining DevOps strategies and best practices.
- Mentoring team members and improving team productivity.
- Communicating system performance, risks, and improvements to stakeholders.

DevOps Team Lead Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 6 to 10+ years of experience in DevOps, system administration, or related roles with leadership experience.
- Strong expertise in CI/CD tools such as Jenkins, GitHub Actions, or GitLab CI.
- Advanced experience with cloud platforms such as AWS, Azure, or Google Cloud.
- Strong knowledge of infrastructure-as-code tools such as Terraform or Ansible.
- Experience with containerization tools such as Docker and Kubernetes.
- Proficiency in scripting languages such as Bash or Python.
- Familiarity with version control systems such as Git.
- Strong understanding of networking, monitoring, and security practices.
- Excellent leadership, communication, and decision-making skills.
- Strong problem-solving and analytical thinking abilities.
