

Digital Banking Specialist Job Description

We are looking for a knowledgeable and customer-focused digital banking specialist who, along with our technology and banking teams, will be responsible for managing and improving digital banking services. Duties will include but are not limited to supporting online banking platforms, enhancing user experience, and ensuring secure and efficient financial transactions. You will collaborate with IT teams, product managers, and stakeholders to deliver innovative and reliable digital banking solutions.

A bachelor's degree in computer science, finance, information technology, or a related field is required. Candidates should have 1 to 4 years of experience in digital banking, FinTech, or related roles.

Digital Banking Specialist Responsibilities:

- Supporting and maintaining digital banking platforms and services.
- Enhancing user experience for online and mobile banking applications.
- Monitoring system performance and resolving technical or operational issues.
- Ensuring secure processing of digital financial transactions.
- Collaborating with IT and product teams to implement new features.
- Assisting in compliance with banking regulations and security standards.
- Analyzing user behavior and transaction data to improve services.
- Providing support for customers using digital banking platforms.
- Testing and validating digital banking features and updates.
- Staying updated with digital banking trends and technologies.

Digital Banking Specialist Requirements:

- A bachelor's degree in computer science, finance, information technology, or a related field.
- 1 to 4 years of experience in digital banking, FinTech, or related roles.
- Understanding of digital banking systems and financial platforms.
- Familiarity with mobile and online banking applications.
- Knowledge of data security, encryption, and regulatory compliance.
- Basic knowledge of APIs and system integrations.
- Strong analytical and problem-solving skills.
- Good communication and customer service abilities.
- Ability to work with cross-functional teams.
- Interest in financial technologies and digital transformation.
