

FinTech Software Engineer Job Description

We are looking for a skilled and detail-oriented FinTech software engineer who, along with our engineering and finance teams, will be responsible for designing, developing, and maintaining financial software systems. Duties will include but are not limited to building secure payment systems, integrating financial APIs, and ensuring high-performance transaction processing. You will collaborate with developers, financial analysts, and stakeholders to deliver scalable and reliable financial technology solutions.

A bachelor's degree in computer science, software engineering, finance, or a related field is required. Candidates should have 2 to 5 years of experience in software development, FinTech, or related roles.

FinTech Software Engineer Responsibilities:

- Designing and developing financial software applications and systems.
- Building and integrating payment gateways and financial APIs.
- Ensuring secure and efficient handling of financial transactions.
- Collaborating with finance teams to understand business requirements.
- Implementing fraud detection and risk management features.
- Optimizing transaction processing systems for performance and scalability.
- Working with databases to manage financial data.
- Ensuring compliance with financial regulations and standards.
- Debugging, testing, and maintaining financial applications.
- Staying updated with FinTech technologies and industry trends.

FinTech Software Engineer Requirements:

- A bachelor's degree in computer science, software engineering, finance, or a related field.
- 2 to 5 years of experience in software development, FinTech, or related roles.
- Strong knowledge of programming languages such as Java, Python, or JavaScript.
- Experience with APIs, microservices, and distributed systems.
- Familiarity with payment systems and financial platforms.
- Understanding of financial concepts such as transactions, payments, and risk management.
- Knowledge of data security, encryption, and compliance standards.
- Familiarity with databases and SQL.
- Strong analytical and problem-solving skills.
- Good communication and teamwork abilities.
