

Junior Blockchain Developer Job Description

We are looking for a motivated and enthusiastic junior blockchain developer who, along with our engineering team, will be responsible for assisting in the development of blockchain-based applications and smart contracts. Duties will include but are not limited to writing and testing smart contracts, supporting decentralized application (dApp) development, and learning blockchain technologies. You will collaborate with senior developers and stakeholders to build secure and scalable decentralized solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 0 to 2 years of experience in blockchain development, software development, or related roles, including internships.

Junior Blockchain Developer Responsibilities:

- Assisting in the development and deployment of blockchain applications and smart contracts.
- Writing and testing smart contracts using languages such as Solidity.
- Supporting decentralized application (dApp) development.
- Collaborating with senior developers to design blockchain solutions.
- Debugging and troubleshooting blockchain-related issues.
- Integrating blockchain systems with front-end and back-end applications.
- Ensuring security and efficiency of smart contracts.
- Participating in code reviews and testing processes.
- Learning blockchain protocols, tools, and frameworks.
- Staying updated with blockchain trends and technologies.

Junior Blockchain Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 0 to 2 years of experience in blockchain development, software development, or related roles or internships.
- Basic knowledge of blockchain concepts and decentralized systems.
- Familiarity with smart contract development using Solidity or similar languages.
- Understanding of Ethereum or other blockchain platforms.
- Basic knowledge of programming languages such as JavaScript, Python, or C++.
- Familiarity with version control systems such as Git.
- Strong problem-solving and analytical thinking skills.
- Good communication and teamwork abilities.
- Willingness to learn and explore blockchain technologies.
