

Junior Data Scientist Job Description

We are looking for a motivated and analytical Junior Data Scientist who will assist in analyzing data, building basic machine learning models, and extracting insights to support decision-making. You will work closely with senior data scientists and engineers to develop data-driven solutions and gain hands-on experience in real-world projects.

A bachelor's degree in computer science, data science, artificial intelligence, or a related field is required. Candidates should have 0 to 2 years of experience in data science, machine learning, or related roles.

Junior Data Scientist Responsibilities:

- Assisting in data collection, cleaning, and preprocessing.
- Performing exploratory data analysis (EDA).
- Supporting the development of basic machine learning models.
- Collaborating with team members to understand data requirements.
- Visualizing data insights using charts and dashboards.
- Writing clean and efficient code under supervision.
- Testing and validating models and results.
- Documenting processes and findings.
- Learning and applying best practices in data science.
- Staying updated with new tools and techniques in AI and data science.

Junior Data Scientist Requirements:

- A bachelor's degree in computer science, data science, artificial intelligence, or a related field.
- 0 to 2 years of experience in data science or machine learning.
- Basic knowledge of Python or R.
- Familiarity with libraries such as Pandas, NumPy, or scikit-learn.
- Understanding of statistics and data analysis concepts.
- Experience with data visualization tools such as Matplotlib, Seaborn, or Power BI.
- Basic knowledge of SQL and databases.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Willingness to learn and grow in the field.
