

Junior Full-Stack Developer Job Description

We are looking for a motivated and versatile junior full-stack developer who, along with our development team, will be responsible for assisting in building and maintaining both front-end and back-end components of web applications. Duties will include but are not limited to writing code, debugging applications, and supporting the development lifecycle. You will collaborate with designers, backend developers, and other team members to deliver responsive and scalable web solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 0 to 2 years of experience in web or full-stack development or relevant internships.

Junior Full-Stack Developer Responsibilities:

- Assisting in the development of both front-end and back-end components of web applications.
- Writing clean, efficient, and maintainable code using languages such as JavaScript, Python, or Java.
- Working with front-end technologies such as HTML, CSS, and JavaScript.
- Assisting in back-end development using frameworks such as Node.js, Django, or Spring.
- Participating in debugging, testing, and troubleshooting application issues.
- Collaborating with designers to implement user interface and user experience designs.
- Assisting in integrating RESTful APIs and third-party services.
- Supporting database operations using SQL or NoSQL databases.
- Working with version control systems such as Git.
- Learning and applying new technologies, tools, and frameworks.

Junior Full-Stack Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 0 to 2 years of experience in full-stack or web development or internships.
- Basic knowledge of programming languages such as JavaScript, Python, or Java.
- Familiarity with front-end technologies such as HTML, CSS, and JavaScript.
- Basic understanding of back-end frameworks such as Node.js, Django, or Spring.
- Familiarity with databases and SQL or NoSQL systems.
- Understanding of RESTful APIs and web services.
- Familiarity with version control systems such as Git.
- Strong problem-solving and analytical thinking skills.
- Good communication and teamwork skills.
- Willingness to learn and grow in a fast-paced environment.
