

Junior Mobile App Developer Job Description

We are looking for a motivated and detail-oriented junior mobile app developer who, along with our development team, will be responsible for assisting in the design, development, and maintenance of mobile applications. Duties will include but are not limited to writing code, debugging applications, and supporting mobile development processes. You will work closely with senior developers and cross-functional teams to deliver user-friendly and high-performance mobile applications.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 0 to 2 years of experience in mobile app development or relevant internships.

Junior Mobile App Developer Responsibilities:

- Assisting in the development and maintenance of mobile applications for Android and iOS platforms.
- Writing clean, efficient, and maintainable code using languages such as Dart, Kotlin, Swift, or Java.
- Working with mobile development frameworks such as Flutter or React Native.
- Participating in debugging, testing, and troubleshooting mobile application issues.
- Collaborating with designers and developers to implement user interface and user experience designs.
- Assisting in integrating APIs and third-party services.
- Supporting the mobile app development lifecycle including development, testing, and deployment.
- Learning and applying best practices in mobile app development.
- Documenting code and technical processes.
- Ensuring application performance, quality, and responsiveness.

Junior Mobile App Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 0 to 2 years of experience in mobile app development or internships.
- Basic knowledge of mobile programming languages such as Dart, Kotlin, Swift, or Java.
- Familiarity with mobile frameworks such as Flutter or React Native.
- Understanding of mobile UI/UX principles.
- Basic knowledge of RESTful APIs and backend integration.
- Familiarity with version control systems such as Git.
- Basic understanding of databases and data storage.
- Strong problem-solving and analytical thinking skills.
- Good communication and teamwork skills.
- Willingness to learn and grow in a fast-paced environment.
