

Lead Big Data Engineer Job Description

We are looking for an experienced and strategic Lead Big Data Engineer who will be responsible for leading the design, development, and optimization of large-scale data systems. You will define data architecture, manage engineering teams, and collaborate with stakeholders to deliver scalable and high-performance data solutions.

A bachelor's degree in computer science, data engineering, data science, or a related field is required. Candidates should have 6+ years of experience in data engineering, big data, or related roles, including leadership experience.

Lead Big Data Engineer Responsibilities:

- Leading the design and development of big data architectures and pipelines.
- Defining data strategies and system architecture for scalable solutions.
- Managing and mentoring a team of data engineers.
- Overseeing data processing, storage, and integration systems.
- Collaborating with data scientists and stakeholders to align solutions with business goals.
- Building and optimizing large-scale data pipelines and workflows.
- Ensuring data quality, security, and governance standards.
- Reviewing code, pipelines, and architectures to enforce best practices.
- Driving innovation and adoption of new big data technologies.
- Staying updated with emerging trends in data engineering and big data.

Lead Big Data Engineer Requirements:

- A bachelor's degree in computer science, data engineering, data science, or a related field.
- 6+ years of experience in data engineering or big data technologies.
- Proven experience in leading teams or managing data engineering projects.
- Strong proficiency in Python, Java, or Scala.
- Expertise in big data frameworks such as Hadoop, Spark, or Kafka.
- Strong understanding of data architecture, ETL pipelines, and distributed systems.
- Experience with cloud platforms and large-scale data systems.
- Excellent leadership, communication, and problem-solving skills.
- Ability to manage complex systems and drive technical decisions.
- Strong focus on delivering reliable and scalable data solutions.
