

Lead Business Intelligence Analyst Job Description

We are looking for an experienced and strategic Lead Business Intelligence (BI) Analyst who will be responsible for leading BI initiatives, defining analytics strategies, and managing a team of analysts. You will work closely with stakeholders to transform data into strategic insights that drive business performance and decision-making.

A bachelor's degree in computer science, data science, business analytics, information systems, or a related field is required. Candidates should have 6+ years of experience in business intelligence, data analysis, or related roles, including leadership experience.

Lead Business Intelligence Analyst Responsibilities:

- Leading BI projects and defining analytics strategies.
- Managing and mentoring a team of BI analysts.
- Designing advanced dashboards, reports, and data visualization solutions.
- Translating business needs into data-driven strategies.
- Identifying KPIs, trends, and performance metrics.
- Collaborating with stakeholders to align analytics with business goals.
- Writing and optimizing complex SQL queries.
- Ensuring data governance, quality, and consistency.
- Driving data-driven decision-making across the organization.
- Staying updated with BI tools, technologies, and industry trends.

Lead Business Intelligence Analyst Requirements:

- A bachelor's degree in computer science, data science, business analytics, information systems, or a related field.
- 6+ years of experience in BI or data analysis.
- Proven experience in leading teams or managing analytics projects.
- Strong proficiency in SQL and Excel.
- Expertise in BI tools such as Power BI, Tableau, or Looker.
- Proficiency in Python or R is a plus.
- Strong understanding of data analysis, KPIs, and business metrics.
- Excellent leadership, communication, and problem-solving skills.
- Ability to translate data into strategic business insights.
- Strong focus on data accuracy, governance, and reporting quality.
