

Lead Computer Vision Engineer Job Description

We are looking for an experienced and strategic Lead Computer Vision Engineer who will be responsible for leading the development of advanced computer vision systems and driving technical direction. You will manage a team of engineers, define system architecture, and collaborate with stakeholders to deliver scalable and high-performance vision-based solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 6+ years of experience in computer vision, machine learning, or related roles, including leadership experience.

Lead Computer Vision Engineer Responsibilities:

- Leading the design and development of computer vision models and systems.
- Defining technical strategies and system architecture for vision applications.
- Managing and mentoring a team of computer vision engineers.
- Overseeing model deployment and performance in production environments.
- Collaborating with data scientists and stakeholders to align solutions with goals.
- Building and optimizing large-scale data pipelines for visual data.
- Ensuring model accuracy, scalability, and reliability.
- Reviewing code, models, and system designs to enforce best practices.
- Driving innovation and adoption of new vision technologies.
- Staying updated with emerging trends in computer vision and AI.

Lead Computer Vision Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 6+ years of experience in computer vision or machine learning.
- Proven experience in leading teams or managing projects.
- Strong proficiency in Python.
- Expertise in frameworks such as OpenCV, TensorFlow, or PyTorch.
- Strong understanding of deep learning, neural networks, and image processing.
- Experience with system design, deployment, and scalability.
- Excellent leadership, communication, and problem-solving skills.
- Ability to manage complex systems and drive technical decisions.
- Strong focus on delivering high-quality and production-ready solutions.
