

Lead Data Analyst Job Description

We are looking for an experienced and strategic Lead Data Analyst who will be responsible for leading data analysis initiatives, defining analytical strategies, and guiding a team of analysts. You will work closely with stakeholders to translate data into actionable insights and support business decision-making at a strategic level.

A bachelor's degree in computer science, data science, statistics, business analytics, or a related field is required. Candidates should have 6+ years of experience in data analysis or related roles, including leadership experience.

Lead Data Analyst Responsibilities:

- Leading data analysis projects and defining analytical strategies.
- Managing and mentoring a team of data analysts.
- Overseeing data collection, cleaning, and preprocessing processes.
- Designing advanced dashboards, reports, and data visualization solutions.
- Collaborating with stakeholders to align data insights with business goals.
- Interpreting complex data and delivering strategic recommendations.
- Ensuring data quality, accuracy, and governance standards.
- Writing and optimizing complex SQL queries.
- Driving data-driven decision-making across the organization.
- Staying updated with emerging trends in data analytics and tools.

Lead Data Analyst Requirements:

- A bachelor's degree in computer science, data science, statistics, business analytics, or a related field.
- 6+ years of experience in data analysis or related roles.
- Proven experience in leading teams or managing analytical projects.
- Strong proficiency in SQL and Excel.
- Expertise in data visualization tools such as Power BI or Tableau.
- Proficiency in Python or R for data analysis.
- Strong understanding of statistics and analytical methodologies.
- Excellent leadership, communication, and problem-solving skills.
- Ability to translate data into strategic business insights.
- Strong focus on data accuracy, governance, and quality.
