

Lead Web Developer Job Description

We are looking for a highly experienced and strategic lead web developer who, along with our engineering team, will be responsible for leading the design, development, and delivery of advanced web applications. Duties will include but are not limited to guiding development teams, defining technical direction, and ensuring high-quality, scalable, and secure web solutions. You will collaborate with stakeholders, designers, and product managers to align technical implementations with business goals.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 6 to 9+ years of experience in web development, including leadership responsibilities.

Lead Web Developer Responsibilities:

- Leading the design, development, and deployment of complex web applications.
- Defining front-end and back-end architecture and technical strategy.
- Managing and mentoring web development teams.
- Ensuring code quality, best practices, and adherence to development standards.
- Collaborating with stakeholders and product teams to define requirements and timelines.
- Overseeing the full web development lifecycle from planning to deployment.
- Driving performance optimization, scalability, and security of web applications.
- Coordinating cross-functional teams and improving development workflows.
- Evaluating and integrating new technologies, tools, and frameworks.
- Troubleshooting and resolving complex system and application issues.

Lead Web Developer Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 6 to 9+ years of experience in web development with leadership experience.
- Strong expertise in HTML, CSS, and JavaScript.
- Advanced experience with front-end frameworks such as React, Angular, or Vue.js.
- Strong knowledge of back-end technologies such as Node.js, Python, or PHP.
- Experience with RESTful APIs and web services.
- Strong understanding of databases, SQL, and performance optimization.
- Proficiency with version control systems such as Git.
- Knowledge of web security, scalability, and best practices.
- Excellent leadership, communication, and decision-making skills.
- Strong problem-solving and analytical thinking abilities.
