

NLP Engineer Job Description

We are looking for a skilled and analytical NLP Engineer who will be responsible for designing, developing, and deploying natural language processing models and systems. You will work with large text datasets and collaborate with data scientists and engineers to build intelligent language-based solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 2 to 5 years of experience in NLP, machine learning, or related roles.

NLP Engineer Responsibilities:

- Designing and implementing NLP models and algorithms.
- Processing and analyzing large text datasets.
- Developing deep learning models for tasks such as text classification, sentiment analysis, and named entity recognition.
- Collaborating with teams to integrate NLP systems into applications.
- Optimizing model performance and accuracy.
- Deploying NLP models into production environments.
- Working with data pipelines and improving data quality.
- Debugging and improving existing NLP systems.
- Documenting models, experiments, and results.
- Staying updated with advancements in NLP and AI.

NLP Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 2 to 5 years of experience in NLP or machine learning.
- Strong proficiency in Python.
- Experience with NLP libraries such as spaCy, NLTK, or Hugging Face Transformers.
- Understanding of deep learning and neural networks.
- Knowledge of machine learning algorithms and techniques.
- Experience with model deployment and scalable systems.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Ability to work with large-scale text data.
