

# Security Analyst Job Description

We are looking for a detail-oriented and proactive security analyst who, along with our IT and engineering teams, will be responsible for monitoring, analyzing, and improving the security of systems and networks. Duties will include but are not limited to identifying vulnerabilities, responding to security incidents, and implementing security measures to protect organizational data and infrastructure. You will collaborate with developers, system administrators, and stakeholders to ensure a secure and resilient environment.

A bachelor's degree in computer science, information security, information technology, or a related field is required. Candidates should have 1 to 4 years of experience in cybersecurity or related roles.

## Security Analyst Responsibilities:

- Monitoring systems and networks for security threats and vulnerabilities.
- Conducting security assessments, audits, and vulnerability scans.
- Investigating and responding to security incidents.
- Implementing security controls and best practices.
- Analyzing logs and security alerts to identify potential risks.
- Collaborating with IT and development teams to improve system security.
- Supporting compliance with security standards and regulations.
- Maintaining and updating security policies and procedures.
- Assisting in penetration testing and risk assessment activities.
- Staying updated with emerging threats and cybersecurity trends.

## Security Analyst Requirements:

- A bachelor's degree in computer science, information security, information technology, or a related field.
- 1 to 4 years of experience in cybersecurity or related roles.
- Basic knowledge of network security, firewalls, and intrusion detection systems.
- Familiarity with security tools such as SIEM systems, vulnerability scanners, or antivirus software.
- Understanding of common security frameworks and standards.
- Basic knowledge of scripting or programming is a plus.
- Strong analytical and problem-solving skills.
- Attention to detail and ability to identify security risks.
- Good communication and teamwork abilities.
- Willingness to learn and stay updated with security trends.
