

Senior AI Research Scientist Job Description

We are looking for a highly experienced and innovative Senior AI Research Scientist who will be responsible for leading advanced research initiatives in artificial intelligence and developing state-of-the-art models and algorithms. You will play a key role in shaping research direction, mentoring junior researchers, and collaborating with engineering teams to translate research into impactful real-world applications.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. A master's or PhD is highly preferred. Candidates should have 5+ years of experience in AI research, machine learning, or related roles.

Senior AI Research Scientist Responsibilities:

- Leading research projects in machine learning, deep learning, and AI.
- Developing novel algorithms and improving existing models.
- Publishing research findings in top-tier conferences and journals.
- Designing experiments and validating hypotheses.
- Working with large datasets and evaluating model performance.
- Collaborating with engineers to deploy research into production systems.
- Mentoring junior researchers and guiding team development.
- Staying updated with cutting-edge advancements in AI.
- Contributing to open-source and research communities.
- Presenting research outcomes to stakeholders and technical audiences.

Senior AI Research Scientist Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field (Master's or PhD preferred).
- 5+ years of experience in AI research or machine learning.
- Strong proficiency in Python and scientific computing libraries.
- Experience with machine learning frameworks such as TensorFlow or PyTorch.
- Advanced knowledge of mathematics, statistics, and algorithms.
- Experience with research methodologies and experimental design.
- Strong publication record in AI conferences or journals is a plus.
- Excellent problem-solving and analytical thinking skills.
- Strong communication and collaboration abilities.
- Leadership and mentoring skills.
