

Senior Data Analyst Job Description

We are looking for a highly analytical and experienced Senior Data Analyst who will be responsible for leading data analysis initiatives, extracting insights from complex datasets, and supporting strategic decision-making. You will collaborate with stakeholders, guide junior analysts, and ensure the delivery of high-quality data-driven insights.

A bachelor's degree in computer science, data science, statistics, business analytics, or a related field is required. Candidates should have 4 to 6 years of experience in data analysis or related roles.

Senior Data Analyst Responsibilities:

- Leading data collection, cleaning, and preprocessing processes.
- Performing advanced exploratory data analysis and identifying key trends.
- Designing and maintaining dashboards and reports.
- Interpreting complex data and providing actionable insights.
- Collaborating with stakeholders to understand business requirements.
- Writing complex SQL queries and optimizing data retrieval.
- Ensuring data quality, accuracy, and consistency.
- Mentoring junior data analysts and supporting team development.
- Communicating findings to technical and non-technical audiences.
- Staying updated with data analysis tools and best practices.

Senior Data Analyst Requirements:

- A bachelor's degree in computer science, data science, statistics, business analytics, or a related field.
- 4 to 6 years of experience in data analysis or related roles.
- Strong proficiency in SQL and Excel.
- Experience with data visualization tools such as Power BI or Tableau.
- Proficiency in Python or R for data analysis.
- Strong understanding of statistics and analytical techniques.
- Strong problem-solving and critical thinking skills.
- Excellent communication and presentation abilities.
- Attention to detail and data accuracy.
- Experience working with large and complex datasets.
