

Senior Full-Stack Developer Job Description

We are looking for an experienced and highly skilled senior full-stack developer who, along with our development team, will be responsible for designing, developing, and optimizing complex web applications across both front-end and back-end systems. Duties will include but are not limited to leading development efforts, improving system performance, and ensuring high-quality, scalable, and secure applications. You will collaborate with designers, product managers, and engineers to deliver robust and efficient solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 5 to 8+ years of experience in full-stack or web development or related roles.

Senior Full-Stack Developer Responsibilities:

- Designing, developing, and maintaining complex full-stack web applications.
- Leading front-end and back-end development processes.
- Writing clean, efficient, and high-quality code using languages such as JavaScript, Python, or Java.
- Developing advanced front-end interfaces using frameworks such as React, Angular, or Vue.js.
- Building and optimizing back-end systems using frameworks such as Node.js, Django, or Spring.
- Managing and optimizing databases using SQL or NoSQL technologies.
- Ensuring application scalability, performance, and security.
- Reviewing code and enforcing best practices and coding standards.
- Mentoring junior developers and supporting team growth.
- Integrating APIs and third-party services.

Senior Full-Stack Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 5 to 8+ years of experience in full-stack or web development or related roles.
- Strong expertise in programming languages such as JavaScript, Python, or Java.
- Advanced experience with front-end technologies such as HTML, CSS, JavaScript, and frameworks like React, Angular, or Vue.js.
- Strong experience with back-end frameworks such as Node.js, Django, or Spring.
- Strong understanding of databases, SQL, and NoSQL systems.
- Experience with RESTful APIs and web services.
- Proficiency with version control systems such as Git.
- Knowledge of system design, scalability, and performance optimization.
- Excellent problem-solving and analytical thinking skills.
- Strong communication and teamwork abilities.
- Ability to lead projects and make technical decisions.
