

Senior Mobile App Developer Job Description

We are looking for an experienced and highly skilled senior mobile app developer who, along with our development team, will be responsible for designing, developing, and optimizing advanced mobile applications. Duties will include but are not limited to leading mobile development efforts, improving application performance, and ensuring high-quality, scalable, and secure mobile solutions. You will collaborate with designers, product managers, and backend teams to deliver robust and user-friendly mobile applications.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 5 to 8+ years of experience in mobile application development or related roles.

Senior Mobile App Developer Responsibilities:

- Designing, developing, and maintaining complex and scalable mobile applications for Android and iOS.
- Leading mobile development projects and guiding technical decisions.
- Writing clean, efficient, and high-quality code using languages such as Dart, Kotlin, Swift, or Java.
- Working with mobile frameworks such as Flutter or React Native.
- Optimizing mobile applications for performance, scalability, and security.
- Reviewing code and ensuring adherence to best practices and coding standards.
- Mentoring junior developers and supporting team growth.
- Integrating APIs and third-party services.
- Troubleshooting and resolving complex mobile application issues.
- Collaborating with cross-functional teams to deliver high-quality products.

Senior Mobile App Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 5 to 8+ years of experience in mobile application development or related roles.
- Strong expertise in mobile programming languages such as Dart, Kotlin, Swift, or Java.
- Advanced experience with mobile frameworks such as Flutter or React Native.
- Strong understanding of mobile architecture, performance optimization, and security.
- Experience with RESTful APIs and backend integration.
- Proficiency with version control systems such as Git.
- Knowledge of databases and mobile data storage solutions.
- Strong problem-solving and analytical thinking skills.
- Excellent communication and teamwork skills.
- Ability to lead projects and make technical decisions.
