

# Senior Payment Systems Architect Job Description

We are looking for a highly experienced and strategic senior payment systems architect who, along with our engineering and finance teams, will be responsible for leading the design, optimization, and governance of large-scale payment systems. Duties will include but are not limited to defining enterprise-level architecture, ensuring secure and scalable transaction processing, and guiding engineering teams. You will collaborate with stakeholders, product teams, and developers to deliver high-performance and compliant payment solutions.

A bachelor's degree in computer science, software engineering, finance, or a related field is required. Candidates should have 10+ years of experience in software engineering, FinTech, or payment systems architecture, including leadership experience.

## Senior Payment Systems Architect Responsibilities:

- Leading the architecture and design of enterprise-scale payment systems.
- Defining long-term technical strategies for secure and scalable transaction processing.
- Overseeing integration of payment gateways, APIs, and financial platforms.
- Ensuring compliance with financial regulations and industry standards (e.g., PCI DSS).
- Guiding engineering teams and mentoring architects and developers.
- Reviewing system designs and enforcing best practices and standards.
- Implementing advanced security measures such as encryption, fraud detection, and risk controls.
- Optimizing system performance, availability, and reliability.
- Managing complex system challenges and critical incidents.
- Communicating architectural decisions and system strategies to stakeholders.

## Senior Payment Systems Architect Requirements:

- A bachelor's degree in computer science, software engineering, finance, or a related field.
- 10+ years of experience in software engineering, FinTech, or payment systems architecture with leadership experience.
- Strong expertise in distributed systems, microservices, and large-scale architecture.
- Deep experience with payment systems, gateways, and transaction processing.
- Strong understanding of financial systems, payment flows, and risk management.
- Knowledge of security standards such as PCI DSS and encryption practices.
- Proficiency in programming languages such as Java, Python, or C++.
- Experience with cloud platforms and high-availability systems.
- Strong analytical and problem-solving skills.
- Excellent leadership, communication, and decision-making abilities.
