

Senior Web Developer Job Description

We are looking for an experienced and highly skilled senior web developer who, along with our development team, will be responsible for designing, developing, and optimizing advanced web applications. Duties will include but are not limited to leading front-end and back-end development efforts, improving system performance, and ensuring high-quality, scalable, and secure web solutions. You will collaborate with designers, product managers, and engineers to deliver robust and user-friendly applications.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 4 to 7+ years of experience in web development or related roles.

Senior Web Developer Responsibilities:

- Designing, developing, and maintaining complex and scalable web applications.
- Leading front-end and back-end development processes.
- Writing clean, efficient, and high-quality code using HTML, CSS, JavaScript, and modern frameworks.
- Working with front-end frameworks such as React, Angular, or Vue.js.
- Developing back-end systems using technologies such as Node.js, Python, or PHP.
- Optimizing web applications for performance, scalability, and security.
- Reviewing code and ensuring adherence to best practices and coding standards.
- Mentoring junior developers and guiding technical decisions.
- Integrating APIs and third-party services.
- Troubleshooting and resolving complex web application issues.

Senior Web Developer Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 4 to 7+ years of experience in web development or related roles.
- Strong expertise in HTML, CSS, and JavaScript.
- Advanced experience with front-end frameworks such as React, Angular, or Vue.js.
- Strong knowledge of back-end technologies such as Node.js, Python, or PHP.
- Experience with RESTful APIs and web services.
- Strong understanding of databases, SQL, and system performance optimization.
- Proficiency with version control systems such as Git.
- Knowledge of web security and best practices.
- Strong problem-solving and analytical thinking skills.
- Excellent communication and teamwork skills.
