

Senior AR Developer Job Description

We are looking for a highly skilled Senior AR Developer who will be responsible for designing, developing, and optimizing advanced augmented reality applications. You will work closely with cross-functional teams to deliver high-quality AR experiences while contributing to system architecture and mentoring junior developers.

A bachelor's degree in computer science, software engineering, multimedia, or a related field is preferred. Candidates should have 4 to 7 years of experience in AR/VR development, game development, or related roles.

Senior AR Developer Responsibilities:

- Designing and developing advanced augmented reality applications and features.
- Building and optimizing interactive AR experiences and environments.
- Writing scalable, efficient, and maintainable code for AR systems.
- Collaborating with designers, developers, and stakeholders to deliver immersive solutions.
- Integrating AR SDKs such as ARKit, ARCore, or Vuforia.
- Optimizing applications for performance, latency, and responsiveness.
- Debugging, testing, and maintaining AR applications.
- Contributing to architectural decisions and system improvements.
- Mentoring junior developers and supporting team growth.
- Staying updated with the latest AR technologies and industry trends.

Senior AR Developer Requirements:

- A bachelor's degree in computer science, software engineering, multimedia, or a related field (preferred).
- 4 to 7 years of experience in AR/VR development or game development.
- Strong experience with AR platforms such as ARKit, ARCore, or Vuforia.
- Proficiency in programming languages such as C#, C++, or JavaScript.
- Experience with Unity or Unreal Engine.
- Solid understanding of 3D graphics and spatial computing.
- Strong knowledge of UX design in augmented environments.
- Excellent problem-solving and analytical skills.
- Strong communication and teamwork abilities.
- Leadership and mentoring skills.
