

Business Intelligence Analyst Job Description

We are looking for a detail-oriented and analytical Business Intelligence (BI) Analyst who will be responsible for transforming data into actionable insights that support business decisions. You will work with stakeholders to understand requirements, build dashboards, and analyze data to improve performance and strategy.

A bachelor's degree in computer science, data science, business analytics, information systems, or a related field is required. Candidates should have 2 to 4 years of experience in business intelligence, data analysis, or related roles.

Business Intelligence Analyst Responsibilities:

- Collecting, cleaning, and analyzing data from multiple sources.
- Designing and developing dashboards and reports.
- Translating business requirements into data-driven solutions.
- Identifying trends, patterns, and key performance indicators (KPIs).
- Collaborating with stakeholders to support decision-making.
- Writing SQL queries to extract and manipulate data.
- Ensuring data accuracy, consistency, and integrity.
- Monitoring business performance through analytics.
- Documenting processes and reporting insights.
- Staying updated with BI tools and industry trends.

Business Intelligence Analyst Requirements:

- A bachelor's degree in computer science, data science, business analytics, information systems, or a related field.
- 2 to 4 years of experience in BI or data analysis.
- Strong proficiency in SQL and Excel.
- Experience with BI tools such as Power BI, Tableau, or Looker.
- Basic knowledge of Python or R is a plus.
- Strong understanding of data analysis and reporting.
- Strong problem-solving and analytical skills.
- Good communication and stakeholder management abilities.
- Attention to detail and data accuracy.
- Ability to translate data into business insights.
