

Cloud Architect Job Description

We are looking for a highly experienced and strategic cloud architect who, along with our engineering and IT teams, will be responsible for designing and managing advanced cloud infrastructure and architecture. Duties will include but are not limited to defining cloud system designs, ensuring scalability and security, and optimizing cloud performance. You will collaborate with stakeholders, engineers, and DevOps teams to deliver efficient and reliable cloud solutions aligned with business objectives.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 7 to 10+ years of experience in cloud computing, system architecture, or related roles.

Cloud Architect Responsibilities:

- Designing and defining cloud architecture for large-scale systems.
- Developing cloud strategies for scalability, reliability, and performance.
- Selecting appropriate cloud services and technologies.
- Collaborating with development and DevOps teams to implement cloud solutions.
- Ensuring cloud security, compliance, and governance standards.
- Optimizing cloud infrastructure for cost efficiency and performance.
- Leading cloud migration and transformation initiatives.
- Reviewing system designs and ensuring architectural consistency.
- Troubleshooting complex cloud and infrastructure issues.
- Maintaining documentation of cloud architecture and technical decisions.

Cloud Architect Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 7 to 10+ years of experience in cloud computing, system architecture, or related roles.
- Strong expertise in cloud platforms such as AWS, Azure, or Google Cloud.
- Advanced knowledge of distributed systems, cloud design patterns, and architecture.
- Experience with infrastructure-as-code tools such as Terraform or CloudFormation.
- Familiarity with containerization technologies such as Docker and Kubernetes.
- Strong understanding of networking, security, and system integration.
- Proficiency with version control systems such as Git.
- Strong analytical and problem-solving skills.
- Excellent communication and technical leadership abilities.
- Ability to align cloud architecture with business goals.
