

Data Analyst Job Description

We are looking for a detail-oriented and analytical Data Analyst who will be responsible for collecting, processing, and analyzing data to support business decisions. You will work with various datasets to identify trends, generate insights, and create reports that help stakeholders make informed decisions.

A bachelor's degree in computer science, data science, statistics, business analytics, or a related field is required. Candidates should have 1 to 3 years of experience in data analysis or related roles.

Data Analyst Responsibilities:

- Collecting, cleaning, and organizing data from multiple sources.
- Performing exploratory data analysis to identify trends and patterns.
- Creating reports, dashboards, and visualizations.
- Interpreting data and providing actionable insights.
- Collaborating with teams to understand business requirements.
- Writing SQL queries to extract and manipulate data.
- Ensuring data accuracy and consistency.
- Supporting decision-making through data-driven analysis.
- Documenting processes and findings.
- Staying updated with data analysis tools and techniques.

Data Analyst Requirements:

- A bachelor's degree in computer science, data science, statistics, business analytics, or a related field.
- 1 to 3 years of experience in data analysis or related roles.
- Proficiency in SQL and Excel.
- Experience with data visualization tools such as Power BI, Tableau, or Excel.
- Basic knowledge of Python or R is a plus.
- Strong understanding of data analysis and statistics.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Attention to detail and accuracy.
- Ability to work with structured and unstructured data.
