

FinTech Data Analyst Job Description

We are looking for a detail-oriented and analytical FinTech data analyst who, along with our engineering and finance teams, will be responsible for analyzing financial data, generating insights, and supporting data-driven decision-making. Duties will include but are not limited to processing transaction data, identifying trends, and building reports that improve financial performance and risk management. You will collaborate with stakeholders, analysts, and developers to deliver actionable insights and optimize financial systems.

A bachelor's degree in computer science, data science, finance, or a related field is required. Candidates should have 1 to 4 years of experience in data analysis, FinTech, or related roles.

FinTech Data Analyst Responsibilities:

- Analyzing financial data and transaction records to identify trends and insights.
- Building dashboards and reports to support business and financial decisions.
- Collaborating with finance teams to understand business requirements.
- Identifying anomalies, risks, and fraud patterns in financial data.
- Writing queries using SQL and working with large datasets.
- Using tools such as Python, Excel, or BI platforms for data analysis.
- Supporting risk management and compliance through data insights.
- Visualizing data and presenting findings to stakeholders.
- Ensuring data accuracy, integrity, and consistency.
- Staying updated with data analysis tools and financial technologies.

FinTech Data Analyst Requirements:

- A bachelor's degree in computer science, data science, finance, or a related field.
- 1 to 4 years of experience in data analysis, FinTech, or related roles.
- Strong knowledge of SQL and database systems.
- Experience with data analysis tools such as Python, Excel, or Power BI.
- Understanding of financial systems and transaction processing.
- Familiarity with data visualization techniques and tools.
- Strong analytical and problem-solving skills.
- Good communication and presentation abilities.
- Ability to work with large datasets and extract meaningful insights.
- Interest in financial technologies and data-driven decision-making.
