

Junior AR Developer Job Description

We are looking for a motivated and detail-oriented Junior AR Developer who will assist in designing, developing, and maintaining augmented reality applications. You will work closely with senior developers and designers to build interactive AR experiences and gain hands-on experience with modern AR technologies.

A bachelor's degree in computer science, software engineering, multimedia, or a related field is preferred. Candidates should have 0 to 2 years of experience in AR/VR development, game development, or related roles.

Junior AR Developer Responsibilities:

- Assisting in the development of augmented reality applications and features.
- Building and testing basic AR experiences and interactions.
- Collaborating with designers and developers to implement AR functionalities.
- Writing clean and efficient code under supervision.
- Debugging and troubleshooting AR applications.
- Supporting the integration of AR SDKs and tools.
- Optimizing applications for performance and usability.
- Participating in testing and improving user experience.
- Learning and applying best practices in AR development.
- Staying updated with emerging AR technologies and tools.

Junior AR Developer Requirements:

- A bachelor's degree in computer science, software engineering, multimedia, or a related field (preferred).
- 0 to 2 years of experience in AR/VR or game development.
- Basic knowledge of AR platforms such as ARKit, ARCore, or Vuforia.
- Familiarity with Unity or Unreal Engine.
- Basic programming knowledge in C#, C++, or JavaScript.
- Understanding of 3D concepts and spatial interactions.
- Strong willingness to learn and grow in AR development.
- Good problem-solving and analytical skills.
- Good communication and teamwork abilities.
- Passion for immersive and interactive technologies.
