

Lead Mobile App Developer Job Description

We are looking for a highly experienced and strategic lead mobile app developer who, along with our engineering team, will be responsible for leading the design, development, and delivery of advanced mobile applications. Duties will include but are not limited to guiding development teams, defining technical direction, and ensuring high-quality, scalable, and secure mobile solutions. You will collaborate with stakeholders, designers, and product managers to align technical implementations with business goals.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 7 to 10+ years of experience in mobile application development, including leadership responsibilities.

Lead Mobile App Developer Responsibilities:

- Leading the design, development, and deployment of complex mobile applications for Android and iOS.
- Defining mobile architecture and technical strategy.
- Managing and mentoring mobile development teams.
- Ensuring code quality, best practices, and adherence to development standards.
- Collaborating with stakeholders and product teams to define requirements and timelines.
- Overseeing the full mobile development lifecycle from planning to deployment.
- Driving performance optimization, scalability, and security of mobile applications.
- Coordinating cross-functional teams and improving development workflows.
- Evaluating and integrating new technologies, tools, and frameworks.
- Troubleshooting and resolving complex application and system issues.

Lead Mobile App Developer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 7 to 10+ years of experience in mobile application development with leadership experience.
- Strong expertise in mobile programming languages such as Dart, Kotlin, Swift, or Java.
- Advanced experience with mobile frameworks such as Flutter or React Native.
- Strong understanding of mobile architecture, performance optimization, and security.
- Experience with RESTful APIs and backend integration.
- Proficiency with version control systems such as Git.
- Knowledge of databases and mobile data storage solutions.
- Excellent leadership, communication, and decision-making skills.
- Strong problem-solving and analytical thinking abilities.
- Ability to align technical solutions with business goals.
