

Lead NLP Engineer Job Description

We are looking for an experienced and strategic Lead NLP Engineer who will be responsible for leading the development of advanced natural language processing systems and defining technical direction. You will manage a team of engineers, design scalable architectures, and collaborate with stakeholders to deliver high-impact language-based AI solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 6+ years of experience in NLP, machine learning, or related roles, including leadership experience.

Lead NLP Engineer Responsibilities:

- Leading the design and development of NLP models and systems.
- Defining technical strategies and system architecture for NLP applications.
- Managing and mentoring a team of NLP engineers.
- Overseeing deployment and monitoring of NLP models in production.
- Collaborating with data scientists and stakeholders to align solutions with business goals.
- Building and optimizing large-scale data pipelines for text data.
- Ensuring model accuracy, scalability, and reliability.
- Reviewing code, models, and system designs to enforce best practices.
- Driving innovation and adoption of new NLP technologies.
- Staying updated with emerging trends in NLP and AI.

Lead NLP Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 6+ years of experience in NLP or machine learning.
- Proven experience in leading teams or managing NLP projects.
- Strong proficiency in Python.
- Expertise in NLP frameworks such as spaCy, NLTK, or Hugging Face Transformers.
- Strong understanding of deep learning, neural networks, and language models.
- Experience with system design, deployment, and scalability.
- Excellent leadership, communication, and problem-solving skills.
- Ability to manage complex systems and drive technical decisions.
- Strong focus on delivering high-quality and production-ready solutions.
