

Lead Reinforcement Learning Engineer Job Description

We are looking for an experienced and strategic Lead Reinforcement Learning Engineer who will be responsible for leading the development of advanced reinforcement learning systems and defining technical direction. You will manage a team of engineers, design scalable architectures, and collaborate with stakeholders to deliver high-impact AI solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 6+ years of experience in machine learning, reinforcement learning, or related roles, including leadership experience.

Lead Reinforcement Learning Engineer Responsibilities:

- Leading the design and development of reinforcement learning models and systems.
- Defining technical strategies and system architectures for RL applications.
- Managing and mentoring a team of engineers.
- Overseeing training, evaluation, and deployment of RL models.
- Collaborating with data scientists and stakeholders to align solutions with goals.
- Developing advanced decision-making systems and intelligent agents.
- Optimizing reward functions, policies, and training pipelines.
- Ensuring model scalability, reliability, and performance.
- Reviewing code, models, and system designs to enforce best practices.
- Staying updated with advancements in reinforcement learning and AI.

Lead Reinforcement Learning Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 6+ years of experience in machine learning or reinforcement learning.
- Proven experience in leading teams or managing AI projects.
- Strong proficiency in Python.
- Expertise in RL frameworks such as OpenAI Gym, Stable-Baselines, or RLlib.
- Advanced understanding of deep learning, neural networks, and optimization techniques.
- Experience with simulation environments and real-world applications.
- Strong problem-solving and analytical skills.
- Excellent leadership, communication, and teamwork abilities.
- Ability to manage complex systems and drive technical decisions.
