

Media and Virtual Reality (VR) Specialist Job Description

We are looking for a creative and technically skilled media and virtual reality (VR) specialist who, along with our design and development teams, will be responsible for creating immersive digital experiences. Duties will include but are not limited to developing VR applications, producing interactive media content, and optimizing user experiences in virtual environments. You will collaborate with designers, developers, and stakeholders to deliver engaging and innovative VR solutions.

A bachelor's degree in computer science, multimedia, game development, or a related field is required. Candidates should have 1 to 4 years of experience in VR development, media production, or related roles.

Media and VR Specialist Responsibilities:

- Developing and maintaining virtual reality (VR) applications and experiences.
- Creating interactive media content for immersive environments.
- Designing 3D environments, assets, and user interactions.
- Collaborating with designers and developers to build engaging experiences.
- Optimizing performance and usability of VR applications.
- Integrating audio, video, and animation into VR systems.
- Testing and debugging VR applications.
- Staying updated with VR/AR technologies and tools.
- Ensuring high-quality user experience and immersion.
- Supporting deployment of VR applications across platforms.

Media and VR Specialist Requirements:

- A bachelor's degree in computer science, multimedia, game development, or a related field.
- 1 to 4 years of experience in VR development, media production, or related roles.
- Familiarity with VR development platforms such as Unity or Unreal Engine.
- Knowledge of 3D modeling and animation tools.
- Experience with programming languages such as C#, C++, or JavaScript.
- Understanding of user experience (UX) design for immersive environments.
- Familiarity with AR/VR devices and systems.
- Strong creativity and problem-solving skills.
- Good communication and teamwork abilities.
- Interest in immersive technologies and digital media.
