

Senior AI Ethics Consultant Job Description

We are looking for a highly experienced and strategic Senior AI Ethics Consultant who will be responsible for leading ethical AI initiatives, ensuring compliance with regulations, and guiding organizations in building responsible and trustworthy AI systems. You will work with cross-functional teams to evaluate risks, establish governance frameworks, and promote ethical decision-making in AI development.

A bachelor's degree in computer science, data science, law, ethics, or a related field is required. A master's degree or specialization in AI ethics or policy is preferred. Candidates should have 5+ years of experience in AI, ethics, governance, or related roles.

Senior AI Ethics Consultant Responsibilities:

- Leading ethical assessments and audits of AI systems.
- Developing and implementing AI governance frameworks and policies.
- Ensuring compliance with global AI regulations and data protection laws.
- Identifying risks related to bias, fairness, transparency, and accountability.
- Advising leadership on ethical implications of AI strategies and deployments.
- Collaborating with data scientists, engineers, and legal teams.
- Designing risk mitigation strategies and ethical guidelines.
- Providing training and mentorship on responsible AI practices.
- Staying updated with evolving AI ethics standards and regulations.
- Communicating complex ethical issues to technical and non-technical stakeholders.

Senior AI Ethics Consultant Requirements:

- A bachelor's degree in computer science, data science, law, ethics, or a related field (Master's preferred).
- 5+ years of experience in AI ethics, governance, or related roles.
- Strong understanding of AI systems and their societal impact.
- Expertise in fairness, bias mitigation, explainability, and responsible AI principles.
- Familiarity with global AI regulations and compliance standards.
- Strong analytical, critical thinking, and risk assessment skills.
- Excellent communication and stakeholder management abilities.
- Ability to bridge technical, legal, and ethical perspectives.
- Experience in developing policies and governance frameworks.
- Leadership and mentoring capabilities.
