

Senior AI Product Manager Job Description

We are looking for a highly experienced and strategic Senior AI Product Manager who will be responsible for leading the development and execution of AI-driven products. You will define product strategy, guide cross-functional teams, and ensure the successful delivery of scalable and impactful AI solutions.

A bachelor's degree in computer science, business, data science, or a related field is required. Candidates should have 5+ years of experience in product management, AI, or related roles.

Senior AI Product Manager Responsibilities:

- Defining and executing product vision, strategy, and roadmap for AI products.
- Leading cross-functional teams including engineers, data scientists, and designers.
- Translating complex business needs into clear technical requirements.
- Prioritizing features and managing product backlogs effectively.
- Overseeing the development, deployment, and lifecycle of AI systems.
- Monitoring product performance and driving continuous improvements.
- Aligning AI product strategies with business goals and user needs.
- Conducting market analysis and identifying new opportunities.
- Communicating product strategy and updates to stakeholders and leadership.
- Staying updated with advancements in AI and product management practices.

Senior AI Product Manager Requirements:

- A bachelor's degree in computer science, business, data science, or a related field.
- 5+ years of experience in product management or AI-related roles.
- Strong understanding of AI, machine learning, and data-driven systems.
- Proven experience in managing complex technical products.
- Excellent leadership and stakeholder management skills.
- Strong analytical and decision-making abilities.
- Experience with Agile, Scrum, or similar methodologies.
- Ability to bridge the gap between technical and business teams.
- Strong communication and presentation skills.
- Ability to drive product innovation and strategic growth.
