

Senior Cloud Engineer Job Description

We are looking for an experienced and highly skilled senior cloud engineer who, along with our engineering and operations teams, will be responsible for designing, implementing, and optimizing complex cloud infrastructure and services. Duties will include but are not limited to leading cloud initiatives, improving system performance, and ensuring secure, scalable, and reliable cloud environments. You will collaborate with development, DevOps, and architecture teams to deliver high-quality cloud solutions.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 5 to 8+ years of experience in cloud computing, DevOps, or related roles.

Senior Cloud Engineer Responsibilities:

- Designing, implementing, and maintaining complex cloud infrastructure on platforms such as AWS, Azure, or Google Cloud.
- Leading cloud deployment and automation initiatives.
- Optimizing system performance, scalability, and cost efficiency.
- Ensuring cloud security, compliance, and best practices.
- Monitoring system performance and proactively resolving issues.
- Collaborating with development and DevOps teams to support application deployment.
- Managing containerization technologies such as Docker and orchestration tools like Kubernetes.
- Implementing infrastructure-as-code using tools such as Terraform or CloudFormation.
- Troubleshooting complex cloud and infrastructure issues.
- Mentoring junior cloud engineers and guiding technical decisions.

Senior Cloud Engineer Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 5 to 8+ years of experience in cloud computing, DevOps, or related roles.
- Strong expertise in cloud platforms such as AWS, Azure, or Google Cloud.
- Advanced experience with infrastructure-as-code tools such as Terraform or CloudFormation.
- Strong knowledge of containerization tools such as Docker and Kubernetes.
- Proficiency in scripting languages such as Bash or Python.
- Experience with CI/CD pipelines and deployment tools.
- Strong understanding of networking, monitoring, and security practices.
- Proficiency with version control systems such as Git.
- Excellent problem-solving and analytical thinking skills.
- Strong communication and teamwork abilities.
