

Senior Data Scientist Job Description

We are looking for a highly skilled and experienced Senior Data Scientist who will be responsible for designing advanced data models, leading data-driven initiatives, and delivering impactful insights. You will play a key role in solving complex problems, guiding junior team members, and collaborating with stakeholders to drive strategic decisions using data.

A bachelor's degree in computer science, data science, artificial intelligence, statistics, or a related field is required. Candidates should have 4 to 7 years of experience in data science, machine learning, or related roles.

Senior Data Scientist Responsibilities:

- Designing and developing advanced machine learning and predictive models.
- Leading data analysis projects and extracting actionable insights.
- Working with large and complex datasets from multiple sources.
- Collaborating with business and technical teams to solve data-driven problems.
- Selecting appropriate algorithms, features, and evaluation techniques.
- Validating and improving model performance and scalability.
- Building and optimizing data pipelines and workflows.
- Mentoring junior data scientists and supporting team development.
- Communicating findings and recommendations to stakeholders.
- Staying updated with the latest advancements in AI and data science.

Senior Data Scientist Requirements:

- A bachelor's degree in computer science, data science, artificial intelligence, statistics, or a related field.
- 4 to 7 years of experience in data science or machine learning.
- Strong proficiency in Python or R.
- Experience with machine learning frameworks such as scikit-learn, TensorFlow, or PyTorch.
- Advanced knowledge of statistics, probability, and data analysis.
- Experience with big data tools and distributed systems is a plus.
- Proficiency in SQL and working with databases.
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.
- Leadership and mentoring skills.
