

Senior Database Administrator Job Description

We are looking for an experienced and highly skilled senior database administrator who, along with our engineering and IT teams, will be responsible for managing, optimizing, and securing complex database systems. Duties will include but are not limited to improving database performance, ensuring data integrity, and implementing advanced backup and recovery strategies. You will collaborate with developers, system administrators, and stakeholders to maintain reliable and efficient data infrastructure.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 5 to 8+ years of experience in database administration or related roles.

Senior Database Administrator Responsibilities:

- Managing and maintaining complex database systems such as MySQL, PostgreSQL, Oracle, or SQL Server.
- Monitoring and optimizing database performance, including query tuning and indexing.
- Ensuring data integrity, security, and availability across systems.
- Designing and implementing backup, recovery, and disaster recovery solutions.
- Managing database access, permissions, and security policies.
- Collaborating with development teams to design efficient database schemas.
- Troubleshooting and resolving complex database issues.
- Leading data migration and integration projects.
- Implementing database monitoring and performance tools.
- Mentoring junior database administrators and guiding best practices.

Senior Database Administrator Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 5 to 8+ years of experience in database administration or related roles.
- Strong expertise in database systems such as MySQL, PostgreSQL, Oracle, or SQL Server.
- Advanced proficiency in SQL and database optimization techniques.
- Strong understanding of database design, normalization, and indexing strategies.
- Experience with backup, recovery, and high-availability solutions.
- Familiarity with cloud-based database services is a plus.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Ability to lead projects and make technical decisions.
