

Senior NLP Engineer Job Description

We are looking for a highly skilled Senior NLP Engineer who will be responsible for designing, developing, and optimizing advanced natural language processing systems. You will work on complex language understanding tasks, contribute to system architecture, and collaborate with cross-functional teams to deliver scalable AI-driven solutions.

A bachelor's degree in computer science, artificial intelligence, data science, or a related field is required. Candidates should have 4 to 7 years of experience in NLP, machine learning, or related roles.

Senior NLP Engineer Responsibilities:

- Designing and implementing advanced NLP models and algorithms.
- Developing deep learning solutions for tasks such as text classification, NER, and language modeling.
- Working with large-scale text datasets and optimizing data pipelines.
- Collaborating with engineers and data scientists to integrate NLP systems.
- Improving model accuracy, efficiency, and scalability.
- Deploying and monitoring NLP models in production environments.
- Debugging and optimizing complex NLP systems.
- Contributing to system architecture and technical decisions.
- Mentoring junior engineers and supporting team development.
- Staying updated with advancements in NLP and AI.

Senior NLP Engineer Requirements:

- A bachelor's degree in computer science, artificial intelligence, data science, or a related field.
- 4 to 7 years of experience in NLP or machine learning.
- Strong proficiency in Python.
- Experience with NLP frameworks such as spaCy, NLTK, or Hugging Face Transformers.
- Advanced understanding of deep learning, neural networks, and language models.
- Experience with model deployment and scalable systems.
- Strong problem-solving and analytical skills.
- Excellent communication and teamwork abilities.
- Leadership and mentoring skills.
- Ability to work on complex language understanding problems.
