

Senior Quality Assurance (QA) Engineer Job Description

We are looking for an experienced and highly skilled senior QA engineer who, along with our development and product teams, will be responsible for ensuring the quality, reliability, and performance of software applications. Duties will include but are not limited to leading testing efforts, designing advanced test strategies, and improving quality assurance processes. You will collaborate with developers, product managers, and stakeholders to deliver high-quality software solutions.

A bachelor's degree in computer science, software engineering, or a related field is required. Candidates should have 4 to 7+ years of experience in software testing or quality assurance or related roles.

Senior Quality Assurance (QA) Engineer Responsibilities:

- Designing and implementing advanced test plans, strategies, and test cases.
- Leading manual and automated testing efforts across applications.
- Developing and maintaining automated test scripts and frameworks.
- Identifying, analyzing, and tracking complex software defects.
- Collaborating with development teams to improve code quality and reduce defects.
- Ensuring applications meet functional, performance, and security requirements.
- Conducting regression, performance, and load testing.
- Reviewing test results and providing actionable insights.
- Mentoring junior QA engineers and guiding best practices.
- Improving QA processes, tools, and methodologies.

Senior Quality Assurance (QA) Engineer Requirements:

- A bachelor's degree in computer science, software engineering, or a related field.
- 4 to 7+ years of experience in software testing or quality assurance or related roles.
- Strong knowledge of testing methodologies, tools, and frameworks.
- Experience with automated testing tools such as Selenium, Cypress, or Playwright.
- Proficiency in programming or scripting languages such as Python, Java, or JavaScript.
- Strong understanding of SDLC, Agile, and DevOps practices.
- Experience with performance testing tools is a plus.
- Familiarity with bug tracking tools such as Jira.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Ability to lead testing initiatives and make quality decisions.
