

Senior Risk Management Analyst Job Description

We are looking for an experienced and highly analytical senior risk management analyst who, along with our finance and technical teams, will be responsible for leading risk assessment initiatives and developing strategies to minimize financial and operational risks. Duties will include but are not limited to evaluating complex risk scenarios, improving risk models, and ensuring compliance with regulatory requirements. You will collaborate with stakeholders and decision-makers to support secure and effective business operations.

A bachelor's degree in finance, computer science, business, or a related field is required. Candidates should have 5 to 8+ years of experience in risk analysis, finance, or data analysis roles.

Senior Risk Management Analyst Responsibilities:

- Analyzing complex financial and operational risks.
- Developing and improving risk assessment models and frameworks.
- Monitoring systems and transactions to detect anomalies and threats.
- Leading risk mitigation strategies and ensuring implementation.
- Ensuring compliance with financial regulations and standards.
- Collaborating with stakeholders to align risk strategies with business goals.
- Preparing detailed reports and presenting insights to senior management.
- Evaluating system vulnerabilities and recommending improvements.
- Mentoring junior analysts and guiding best practices.
- Staying updated with risk management trends and regulatory changes.

Senior Risk Management Analyst Requirements:

- A bachelor's degree in finance, computer science, business, or a related field.
- 5 to 8+ years of experience in risk analysis, finance, or data analysis roles.
- Strong expertise in risk management methodologies and tools.
- Advanced knowledge of data analysis tools such as SQL, Python, or Excel.
- Understanding of financial systems, compliance, and regulatory frameworks.
- Strong analytical, problem-solving, and critical thinking skills.
- Excellent communication and reporting abilities.
- Ability to work with large datasets and complex scenarios.
- Leadership and mentoring capabilities.
- Ability to support strategic decision-making.
