

Senior Technical Support Engineer Job Description

We are looking for an experienced and highly skilled senior technical support engineer who, along with our engineering and support teams, will be responsible for handling complex technical issues, improving support processes, and ensuring high levels of system reliability and customer satisfaction. Duties will include but are not limited to leading troubleshooting efforts, supporting critical systems, and mentoring junior support engineers. You will collaborate with development and IT teams to resolve advanced technical challenges and enhance system performance.

A bachelor's degree in computer science, information technology, or a related field is required. Candidates should have 4 to 7+ years of experience in technical support or related roles.

Senior Technical Support Engineer Responsibilities:

- Diagnosing and resolving complex hardware and software issues.
- Leading troubleshooting efforts for critical system incidents.
- Providing advanced technical support to users and clients.
- Collaborating with development and IT teams to resolve escalated issues.
- Monitoring system performance and ensuring high availability.
- Improving support processes and documentation.
- Mentoring junior support engineers and guiding best practices.
- Managing and prioritizing multiple support requests effectively.
- Supporting system upgrades, deployments, and maintenance.
- Ensuring high levels of customer satisfaction and service quality.

Senior Technical Support Engineer Requirements:

- A bachelor's degree in computer science, information technology, or a related field.
- 4 to 7+ years of experience in technical support or related roles.
- Strong knowledge of operating systems, networking, and system administration.
- Experience with troubleshooting tools and advanced debugging techniques.
- Familiarity with cloud environments and distributed systems is a plus.
- Strong problem-solving and analytical thinking skills.
- Excellent communication and customer service abilities.
- Ability to handle high-pressure situations and critical incidents.
- Familiarity with ticketing and incident management systems.
- Ability to lead support initiatives and improve processes.
